

NCC AVEGO®: Angular is the new dimension –modular multifunctional LED lights

Version „U“

Version „O“

The new NCC® AVEGO LED headlights in the two versions "U" and "O" offer unexpected new design possibilities for your vehicles. A light guide takes over the function of the daytime-running-light, position light and indicator. The latest LED technology is included and a sensationally small installation dimension helps even in difficult installation conditions. The DEUTSCH connector in the housing is supplied ex works, adapters to other connector configurations on request. Versions for ECE LHD and ECE RHD as well as for SAE are available. Inner bezel only available in black. Available from autumn 2019.

Technical data

- /// 12- and 24V
- /// ECE-Homologation
- /// EMC-Homologation
- /// SAE J2139
- /// Temperature:
-40° - +80°C
