

Delivery Situation at NOLDEN

Customer Information

Dear NOLDEN customers,
Dear prospective NOLDEN customers,

as a system supplier of LED lighting for various automotive industries, we are permanently affected by the semiconductor crisis and have to face a difficult procurement situation for semiconductors and electronics at the beginning of the new business year.

In accordance with our guiding principle -YOUR VISION IS OUR MISSION- Nolden Cars & Concepts spares no effort to maintain the delivery capability of our goods and our service offer in the best possible way.

In the past business year, we have experienced a constructive and pragmatic response from our customers, and this year we are again counting on a cooperative partnership.

Please note for your planning this year that we are still affected by continuing global supply and transport bottlenecks.

The supply situation and cost development of semiconductors has worsened over the past weeks and months, as the original supply chains are still very volatile or interrupted. The situation has also worsened in the global logistics chains (transport and customs), with longer transport routes as a consequence.

Following the forecasts of experts, we hope for an improvement of the circumstances in the second half of the year. However, the current situation can only be shouldered together.

Please understand that we continue to depend on your far-reaching planning and early ordering in order to react in the best possible way to replacement times of up to one year and the volatile cost development.

If you have any questions, please do not hesitate to contact us at any time.

With best regards

NOLDEN Cars & Concepts GmbH
David Rautenberg
